

# Medicolegal Services

## Independent Clinical Opinions You Can Rely On

At Capability Support Services, we provide objective, evidence-based medicolegal assessments that stand up to scrutiny. We understand the importance of clarity, accuracy, and defensible reporting within personal injury and legal contexts.

Our approach is grounded in best practice. We invest in ongoing clinician development, rigorous assessment processes, and strong quality assurance to ensure our reports are thorough, balanced, and aligned with current legislation, case law, and contemporary clinical research. Our focus is simple, to deliver clear, reliable, and professional opinions that support informed decision-making.

## Comprehensive Medicolegal Services

### In-Person Assessment

Comprehensive face-to-face evaluations conducted in-clinic or at your client's home, forming the backbone of a defensible medicolegal report.

### Desktop Opinion

A clinical expert opinion based on medical records and existing documentation, with no in-person assessment of the claimant required.

### Supplementary Report

When new medical evidence emerges after the initial report, we provide timely supplementary opinions that integrate the updated information seamlessly.

### Joint Report

Our experts collaborate with practitioners from both sides of a case to produce a balanced, mutually agreed clinical opinion for both parties.

### Expert Witness Testimony

The assessing clinician provides direct court testimony, consistent and credible, grounded in first-hand clinical assessment of the claimant.

### Conclave and Hot Tubbing

Our experts engage directly with opposing experts to clarify, reconcile, or explain differences of clinical opinion in a structured setting.

# What We Offer

## ➤ In-Person & Telehealth Assessments

Flexible assessment options delivered face-to-face or via telehealth, ensuring accessible, thorough, and clinically robust evaluations.

## ➤ File Reviews & Desktop Opinions

Independent expert opinions formed through detailed review of clinical records and documentation, without the need for direct client assessment.

## ➤ Supplementary Reporting

Follow-up reports incorporating newly available information, ensuring opinions remain current, accurate, and comprehensive.

## ➤ Joint Expert Assessments

Collaborative reports developed alongside other appointed experts, providing balanced and impartial perspectives to support legal proceedings.

## ➤ Expert Witness Services

Confident, articulate court appearances from experienced clinicians, with opinions grounded in objective clinical evidence.

## ➤ Expert Conclaves (Hot Tubbing)

Active participation in expert discussions to clarify findings, address differing views, and support resolution through professional dialogue.

## ➤ Initial Case Consultation (No Obligation)

An opportunity to discuss your client's needs and determine the most appropriate assessment pathway with our team.

## ➤ Secure Remote Assessments

High-quality videoconference assessments conducted in a structured, clinically sound manner, maintaining both accessibility and integrity.
